ExtraFe 0.2.0 (Meleti)

Release to public
20/02/2011

[ConfEditor]

[Add] → New side panel
with setting for
confEditor.

[Add] → Option to enable
themes and choose themes.

[ConfEditor - Mame]

[Add] → New builds for
Mame = MamePlus and
MameXT.

[Add] → New roms path.
Now you can add 9 paths and
have new way of look. Now

you can erase the path that you don't like and get more information about
rooms and paths.

[Add] → New statistics panel for database. More options and details.

[Add] → New paths for pcb,titles,scores.

[Add] → New panel with tools for mame. To see the information from History.
da and Mameinfo.dat you must convert it so the ExtraFe can read it.

[Add] → In statistics you can find a wizard to create the filters for
ExtraFe if you not do it in the start creation of database.

[Bug Fixes] → Transparent image for mame.

[Bug Fixes] → Bug fixes here and there.

[Bug Fixes] → The joystick.map and the effect.

[Bug Fixes] → Bugs in database, now smaller with more data.

[Remove] → Paths like inp,crosshair and videos. Videos not supporting (I
hope in the next version ;)).

[ConfEditor - psX]

→ New entry.

[ExtraFe]

[Add] → New graphics design with OpenGL instead of DirectX. (More
Portable).

[Add] → New splash screen for loading procedure of ExtraFe.

[Add] → New menu for choosing emulator.

[Add] → Date and time from the user's machine.

[Emulators - Mame]

[Add] → New smoother way movement from one game to another and one page to
another.

[Add] → Information for every game.

[Add] → Simple effects and cube spinning image for screenshots.

[Add] → Virtual keyboard for searching a games.

[Add] → Fast search based in letter.

[Add] → Bigger image for better view.

[Add] → Now in snapshots you can see 9 images and reloads automatically in seconds.

[Add] → Create up to 255 folders to put inside your favorite games. One folder accepts every game supported by mame. You can erase or rename the folder.

[\[Emulators - pSX\]](#)

→New entry.
